

GAGAN VEGINATI

Data Scientist / Data Analyst

Boston, MA (Open to Relocation / Remote) | (657) 726-5627 | gveginati@gmail.com | linkedin.com/in/gagan-veginati | github.com/gaganv007

PROFESSIONAL SUMMARY

Data Scientist (M.S., Boston University) who turns raw data into models and decisions. Predicted student retention at 89% accuracy across 15,000+ records, cut ETL time 65% on 5GB+ Spark pipelines, and built executive Power BI dashboards. Strong in Python, SQL, statistical modeling, machine learning, and stakeholder communication.

TECHNICAL SKILLS

Analysis & Modeling: Python (Pandas, NumPy, Scikit-learn), R, statistical modeling, Random Forest, XGBoost, Logistic Regression, GNNs, time-series, anomaly detection (Isolation Forest), SMOTE

Data Engineering: SQL (MySQL), Apache Spark, ETL pipeline design, Databricks, data cleaning & validation

Visualization & BI: Power BI (real-time dashboards), Streamlit, Matplotlib/Seaborn, executive reporting

Tools & Cloud: AWS (S3, EC2, SageMaker), Git/GitHub, Jupyter, Excel, Agile/Scrum, JIRA

EXPERIENCE

Graduate Assistant

Jan 2025 – May 2025

Boston University — Department of Computer Science

Boston, MA

- Automated data processing workflows for 500+ students, cutting manual handling time by 30%
- Managed and analyzed large-scale academic datasets powering departmental reporting for 2,000+ students

Data Research Intern

May 2023 – May 2024

SRM University AP — International Relations Department

Amaravati, India

- Developed ML models (Random Forest, XGBoost, Logistic Regression) predicting student retention with 89% accuracy across 15,000+ records
- Built an end-to-end pipeline processing 5GB+ of data with Apache Spark and Python, reducing ETL time by 65%
- Created interactive Power BI dashboards with real-time refresh adopted by administrators for data-driven decisions

PROJECTS

Financial Transaction Anomaly Detection

Jan – May 2024

Python, Scikit-learn, SMOTE, KNN, Random Forest, LSTM

- Addressed severe class imbalance in fraud data using SMOTE, improving F1 by 95% (relative) across three model families
- Benchmarked classical and deep-learning approaches and documented precision/recall trade-offs for stakeholders

GNN-Based Stock Relations & Prediction

Sep – Dec 2025

Python, PyTorch Geometric, Streamlit

- Modeled return correlations across 29 large-cap U.S. stocks; GraphSAGE reached 58.7% directional accuracy (F1 = 0.654) vs. a Random Forest baseline
- Engineered technical-indicator features and short/long-term correlation edges, and compared GCN, GraphSAGE, GAT, and Temporal-GAT architectures

Urban Noise Detection

Aug – Dec 2024

Python, TensorFlow, Audio Classification

- Built an audio-classification model to identify urban sound categories from environmental noise recordings
- Processed raw audio into spectrogram/feature representations and evaluated model accuracy across sound classes

EDUCATION

Boston University — M.S. in Computer Science

Sep 2024 – May 2026

Coursework: Machine Learning, Data Science with Python, Advanced Programming Techniques, Algorithms

Boston, MA

SRM University AP — B.Tech in Computer Science (AI/ML Specialization)

Sep 2020 – May 2024

Coursework: Deep Learning, Computer Vision, Data Structures & Algorithms, Database Management

Amaravati, India

CERTIFICATIONS & LEADERSHIP

- Google Cloud – Prompt Design in Vertex AI; MathWorks – Image Processing & MATLAB Onramp
- Sports Secretary, SRM University AP — led a team of 30 and organized 18+ events for a 15,000-student campus
