

GAGAN VEGINATI

DevOps / MLOps Engineer

Boston, MA (Open to Relocation / Remote) | (657) 726-5627 | gveginati@gmail.com | linkedin.com/in/gagan-veginati | github.com/gaganv007

PROFESSIONAL SUMMARY

DevOps/MLOps-focused engineer (M.S., Boston University) who deploys and operates production services. Shipped a serverless ML application on AWS Lambda with a Bedrock failover path, automated data pipelines that cut processing time 65%, and containerized services with Docker and Kubernetes. Runner-up at the EasyA Consensus hackathon (Toronto, 2025).

TECHNICAL SKILLS

Cloud & Serverless: AWS (Lambda, API Gateway, Bedrock, Amplify, EC2, S3, SageMaker), serverless architecture, cloud-native design

Containers & IaC: Docker, Kubernetes, AWS SAM / CloudFormation, deployment automation

CI/CD & Automation: CI/CD pipelines, GitHub Actions, Git/GitHub, Bash, Linux administration, Python automation

MLOps & Services: MLflow, Weights & Biases, FastAPI, Redis, model serving & failover, Apache Spark, REST APIs

EXPERIENCE

Graduate Assistant

Jan 2025 – May 2025

Boston University — Department of Computer Science

Boston, MA

- Automated data processing workflows for 500+ students, cutting manual handling time by 30%
- Maintained data infrastructure and automated reporting workflows for 2,000+ students

Data Research Intern

May 2023 – May 2024

SRM University AP — International Relations Department

Amaravati, India

- Developed ML models (Random Forest, XGBoost, Logistic Regression) predicting student retention with 89% accuracy across 15,000+ records
- Built an end-to-end pipeline processing 5GB+ of data with Apache Spark and Python, reducing ETL time by 65%

PROJECTS

Gavel — Serverless AI Oracle on AWS

May 2026

AWS Lambda, API Gateway, Bedrock, SAM, FastAPI, Solidity

- Deployed a serverless FastAPI service on AWS Lambda + API Gateway via AWS SAM (infrastructure-as-code), with secrets managed as NoEcho CloudFormation parameters
- Engineered an AWS Bedrock failover path for resilience when the primary LLM API is overloaded, keeping the service available during incidents

ML-Blockchain Integration Platform for MLOps

May 2025

Python, TypeScript, Node.js, Docker, Kubernetes, Ethereum

- Containerized ML-governance services with Docker and orchestrated with Kubernetes, achieving a 3x deployment speedup and cutting integration complexity by 70%
- Authored a Python SDK and automated smart-contract deployment to standardize how models are registered and governed

GNN Stock Prediction — Reproducible Pipeline

Sep – Dec 2025

Python, PyTorch Geometric, Streamlit

- Authored an end-to-end, modular training/evaluation pipeline (data collection, feature engineering, graph construction, training, evaluation) with a Streamlit demo
- Structured the codebase into reusable, config-driven stages so the full pipeline reruns reproducibly with a single command

EDUCATION

Boston University — M.S. in Computer Science

Sep 2024 – May 2026

Coursework: Machine Learning, Data Science with Python, Advanced Programming Techniques, Algorithms

Boston, MA

SRM University AP — B.Tech in Computer Science (AI/ML Specialization)

Sep 2020 – May 2024

Coursework: Deep Learning, Computer Vision, Data Structures & Algorithms, Database Management

Amaravati, India

CERTIFICATIONS & LEADERSHIP

- Google Cloud – Prompt Design in Vertex AI; MathWorks – Image Processing & MATLAB Onramp
- Sports Secretary, SRM University AP — led a team of 30 and organized 18+ events for a 15,000-student campus
